

Recycle clean, dry plastic bags and film packaging

One stop recycling.

You can now bring even more plastic items
to wherever plastic bags are recycled!

Just put your other film packaging in a single bag and make sure bags are clean and dry.

Do not include degradable bags, salad bags, frozen food bags, or material that has been painted or glued, as other substances can contaminate the recycled material.

- You can recycle film packaging with labels if you first remove them, the tape, and adhesive strips.
- Do not include frozen food or salad bags because the barrier polymers or other additives they contain to help protect the food and extend its shelf life are contaminants for film recycling.
- Do not include candy wrappers or pet food bags because these are made from plastic that is incompatible with the other recyclable film packaging.
