

State of Oregon Department of Environmental Quality

Accredited and Proficient Asbestos Laboratories

The following is a list of accredited and/or proficient laboratories that can provide asbestos analytical results for surveys as required by DEQ regulation [OAR 340-248-0270\(3\)\(c\)](#). Please see the [Asbestos Survey Factsheet](#) which outlines the requirements for each survey.

This is not a complete list of all accredited or proficient asbestos laboratories. If you would like your laboratory to be included on this list, please contact the DEQ [asbestos coordinator](#) to confirm you meet the minimum requirements.

DEQ cannot guarantee that the laboratories on this document have maintained their accreditation or proficiency. Customers should verify the lab's credentials by requesting a copy of their certification and ensuring that it has not expired. Services provided and costs are determined solely between the lab and the customer. Including a laboratory's information on this list does not constitute an endorsement by DEQ.
